

> Company profile of the SCHURTER Group

Company: schurter.com/about

SCHURTER is a leading innovator and producer of electronic components. As a Swiss technology company SCHURTER is operating successfully worldwide. In a dynamic market the SCHURTER Group is showing sustainable growth due to the specialized competence, innovative capacity, proximity to customers and financial independence.

Mission

SCHURTER is a leading innovator and producer of fuses, equipment connectors, circuit breakers, input systems and EMC products as well as a service provider for circuit board assembly in the electronics industry. Besides the individual components, SCHURTER offers a total solution with the Solutions unit, where all of the core competences of the company are interconnected and placed at the customer's disposal.

The safe&easy brand claim, however, refers not only to the products but it corresponds to the business philosophy of the entire SCHURTER Group. The company strives for sustainable success through innovation, high-quality products and service, flexibility and proximity to customers.

Customers

Our customers are manufacturers of electrical devices from various industries such as industrial electronics, automotive technology, data & communication, medical technology, energy technology as well as avionics and space.

Products

SCHURTER's focus is on components and systems that ensure a safe power supply and the easy operation of electrical equipment. In addition, we offer electronic manufacturing services for the electronic industry (EMS), the development of customer specific products or systems and the support of pre-compliance measurement for electromagnetic compatibility (EMC).
