Company Profile
Worldwide for Safety
Who we are
SCHURTER is a leading international innovator and manufacturer of fuses, plugs, circuit breakers, input systems and EMC products. SCHURTER also offers services for the electronics industry in the field of printed circuit board assembly and for complete solutions from project planning to the manufacture of end products (solutions). Thanks to a well-organized worldwide network of country representatives and distributors, customers benefit from high product availability and short delivery times.

A Family Business
The SCHURTER company was founded in 1933 by Heinrich Schurter as a limited partnership and converted into a stock corporation in 1949. In 1990, the SCHURTER Holding AG, which still exists today, was founded in Lucerne (Switzerland). Today, SCHURTER employs around 2000 people in 20 countries worldwide and is managed by family members of the third generation: Hans-Rudolf Schurter is Chairman of the Board of Directors of SCHURTER Holding AG. In January 2015, Hans-Rudolf Schurter handed over the operational management of the SCHURTER Group to Ralph Müller. For the first time in the more than 80-year history of the company, the operational management of SCHURTER was handed over to someone outside of the family. In order to secure its position as a leading innovator and producer of electronic components, the SCHURTER Group has been significantly enlarged through acquisitions in recent years.

Our customers receive the world’s best products, now and in the future, which meet their individual requirements. The outstanding quality of our products and compatible way of doing business are a permanent obligation for SCHURTER.

Continuity and Growth
Our Vision
The SCHURTER Group is the world’s leading Swiss technology company for safe power supply, simple operation and the most demanding complete solutions.

Our Mission
The SCHURTER Group is a successful Swiss family-owned company operating worldwide. With our components for safe power supply, input systems for simple operation and sophisticated overall solutions, we provide our customers with agility and excellent product and service quality. We focus on the segments of industrial electronics, medical technology, automotive technology, data & communication, aerospace and energy technology. In these dynamic markets, we are growing at an above-average rate. We work closely with our customers worldwide, directly and through our partner network with a high level of commitment. Thanks to high professional competence, financial independence, extraordinary innovative strength and a distinctive corporate culture, we lead the SCHURTER Group into the digital future together with our customers and partners.

"Our customers fully rely on their machines. They can do that too. Because the SCHURTER components can withstand a lot. This has always been the case. SCHURTER quality."

Hans Estermann | Customer | Product Manager
Success Factors
The Key to Success
As a leading partner in the electronics and electrical industry for passive and electromechanical components, we at SCHURTER strive for profit-oriented growth. It is a matter of great concern to the SCHURTER management to manage the company according to ethical principles: responsible, fair, respectful. Personnel and environmental management, quality assurance, process handling, work safety and socially responsible action: These are all indispensable prerequisites for the quality of our products and services – and key factors for the sustained success of SCHURTER.

"The highly professional cooperation with SCHURTER has not only produced a groundbreaking specification for the qualification of fuses for space travel – it has also been a real pleasure. In addition to their excellent technological competence, the employees involved also proved to be extremely pleasant to work with."

Business Excellence and Sustainability
We live Business Excellence
SCHURTER’s goal is to achieve outstanding results and added value for all interest groups in the long term. We have therefore been consistently applying TQM (Total Quality Management) and Business Excellence since 1991. We manage, monitor and improve processes with various management systems that are structured and certified according to ISO 9001, ISO 13485, ISO 45001 and IATF 16949. We make targeted use of SIX SIGMA’s recognized problem-solving methods in order to minimize sources of error and guarantee high process reliability.

We are Committed to Sustainability
Sustainability is a success factor. SCHURTER has been committed to this for a long time – and with regard to aspects that go far beyond healthy long-term economic development and careful treatment of the environment. Sustainability thus also determines our social commitment and our management principles. At SCHURTER, the focus is on technology – and on people.

“We meet customer expectations with a broad product range, high service quality and continuous improvement of all business processes.”

We are Available Worldwide

SCHURTER is a leading, globally active industrial partner – and thus very close to the market: with headquarters in Europe, America and Asia, with around 60 country representatives and more than 200 distributors, all of whom are anchored in the top segment of their industry. This enables us to guarantee the availability of our products and solutions around the globe – as well as access to all relevant technical information around the clock.

We Cultivate our Relationships on Site

SCHURTER and its international representatives are very familiar with the respective regulations and requirements on site. Together we follow trends and satisfy needs in the market in general as well as for individual users. This strong presence in the sales regions gives us the opportunity to produce locally wherever possible. In-line with the market and remaining competitive, but always with the same uncompromising quality philosophy that is determined by the Swiss parent company.

"Zero error is our goal. We’ll never quite reach this goal, but we’re getting closer every day, and that’s exactly what we have to strive for. Day by day. That’s Automotive!"

Christian Holzgang | CEO | SCHURTER AG

Quality and Innovation
Innovation as a Driving Force for Growth
To be successful with and for our customers is our constant incentive. We are used to innovatively meeting the challenges in the various markets. We show courage in implementing new ideas and encourage and challenge our development teams on a daily basis.

Continuous Improvement
SCHURTER offers a consistently high quality and absolute reliability of every single one of its products. Modern machinery and state-of-the-art technical know-how guarantee the implementation of the motto “Safe power supply – simple operation”. Our products carry all country-specific test marks such as VDE, ENEC, UL, CSA, CCC, METI or KTL.

Recognizing Customer Needs
SCHURTER supplies over 100,000 customers in the fields of industrial electronics, medical technology, data and communication, aerospace, automotive and power engineering. We develop selected products in close cooperation with our customers.

“Innovation is our business. In SCHURTER we have found a flexible and reliable partner who helps us to implement our ideas at the highest level.”

Roland Durot | Customer | System Planner
SCHURTER Holding AG is headquartered in Lucerne (Switzerland). We develop, produce and distribute our products in plants in Switzerland, Germany, the Czech Republic, China, France, India, Romania, Slovakia, Great Britain and the Netherlands. Other important sales offices are located in the USA, Sweden, Italy, Singapore, Poland, Austria and Brazil. Agencies in around 60 countries and over 200 distributors guarantee that SCHURTER is internationally present.
It is our aim to contribute to the business success of our customers with high-quality products and outstanding customer service. At SCHURTER, we work closely with various technology partners. Within SCHURTER, we see these partners as important key factors in successfully producing the best and most innovative solutions for you.

SCHURTER supports key customers with special account managers to establish and expand a long-term business relationship. We at SCHURTER are proud to count these and many other companies among our customers.

"We align our innovation-driven system to customer-specific solutions of any type of input system. Due to our extensive knowledge in different fields of technology and customer-focused project management, we deliver quality systems for nearly all applications to full customer satisfaction."

Bruno Ochs | Managing Director | SCHURTER GmbH
Modern electronic systems are becoming increasingly complex. Application-specific safety solutions are required to protect sensitive circuits. At the same time, ergonomic simple operation is an absolute must. SCHURTER offers a wide range of components and solutions: on the one hand, these are generally usable products, on the other hand, solutions geared to the various industries and meeting individual requirements.
Industrial Equipment
Worldwide approved components – standard or customer specific
SCHURTER offers a wide range of internationally approved components that can be used in almost all industrial plants. More than 20,000 products are available worldwide from your preferred specialist dealer.

Medical Equipment
Proven and approved solutions you can rely on
SCHURTER components for high-quality medical equipment are used wherever certified and absolutely safe solutions are required.

Data and Communication
Secure power supply and simple processing for use in data centers
Standardised, high-quality components for simple and automated assembly processes are required for the creation of systems in data processing centers in order to rule out errors.

Automotive
Approved solutions for a dynamic market
The rising demand for hybrid and electric vehicles is stimulating the automotive industry. The quality and operational reliability of our individual solutions are guaranteed by the most demanding qualification procedures.

Energy
Trouble-free energy supply is a key competence of the 21st century
SCHURTER offers a wide range of internationally approved components as well as customized solutions which are used in reliable power supply systems.

Avionics and Space
Absolute operational reliability under extreme conditions
SCHURTER supplies zero-defect solutions to meet the highly specific requirements of electronic systems used in aircraft, satellites and spacecraft.
Products, Technologies and Solutions
The approach of operating a data center with DC voltage is obvious. If the servers already work with DC voltage, it only makes sense to use it as continuously as possible throughout the entire chain.
